INTRODUCTION

I was born in Brescia in 1979, in a middle class clerks family. My grandfather (partisan) was a good educator for me and he was a idealist.

Since I was young I manifest a real aptitude for art, the only heritage from my mom, an amateur guitar player passed away prematurely. Since I was five I danced and paint, from 17 to 21 I found a music band where I used to play drums and write songs. After I threw myself to organize concert and cultural event .

With the filmmaker Piero Galli I found "Festival Intercomunale di Cinema Amatoriale", which is now in its XI edition. The cinema world keeps me for a while, I played in some short films and I realized some movies as director/screenwriter.

In between I reach my architectural degree in 2005. Since then I work as freelance architect, but I never stop to photograph.

I do that for the intimate pleasure that it gives me.

I love reportage photography, portraits and still life.
