

TADAOCERN

ARTIST'S STATEMENT

Tadao Cern(Tadas Cerniauskas)

I try not to take everything that is around me for granted - I question a lot and all that I create comes out of curiosity. Every single day I spend at my studio and my creative process resembles playing. I'm looking for things that can bring that unique childlike sense of discovery. That is the reason why it might seem that I am working on so many different themes and trying not to stick to one media. But actually all that I'm trying to do is to look for "not obvious in very obvious"; and how same thing in a different environment or conditions gets a totally different meaning and purpose.

I've spent my last 5 years in photography field, but now I've decided to drift away from it and concentrate on conceptual painting and installation art.
