# Twin Flames, One Love

**Twin Flames, One Love** is a travelling exhibition of visionary paintings and collaborative murals by artists **Broňa Wingell & Ritchie Sinclair**.

This breathtaking exhibit features UV-reactive art that celebrates and chronicles the magical experience of love shared by the artists.

Known as “medicine art” or “vibrational art”, this talismanic energy and imagery has been passed down from ancient shamanic sources that are as beneficial and relevant today as they were eons ago.

**Twin Flames, One Love** reconnects us to the organic, the universal and the sacred, enticing us to explore, create, and perhaps become; love.

**Broňa Wingell** from Bratislava, Slovakia, now resides in Toronto, Canada. She has a deep reverence for the spirit in all things and paints for the beauty inherent in the process.

**Ritchie Sinclair**, of Scottish lineage from Thunder Bay, Canada, apprenticed with shaman artist, Norval Morrisseau, and is a founding member of the Thunderbird School of Shamanistic Art.

The two partners-in-love paint, teach and exhibit together.

“Our artistic effort is both a personal approach to Spirit  
and ideally a source of inspiration to others.

The theme of our art is love.”

## Brona Wingell

Brona's unique experience in the arts dates from before age 15, although only recently she began to produce paintings. The trigger which sparked her interest was in meeting and painting with Ritchie Sinclair; a well established Canadian woodland artist. His paintings deeply moved her and inspired her to pursue her own artistic path as a painter. Since 2013 she has created an extensive array of paintings and drawings, including painting large-scale collaborative murals with Sinclair.

Brona's art has been deeply influenced by the sacred symbolism inherent in Canadian Woodland art, and with the art-form's prominent colors and black outline, so reminiscent of stain-glass windows. Her artistic medium of choice is acrylic paint applied to canvas or reclaimed furniture. She also converts her black & white drawings into striking prints using a contrast inversion technique.

As a former professional dancer and dance teacher, Brona's stunning paintings are intricately choreographed with beautifully fluent form and razor-sharp lines. From nature, she derives personal inspiration and a sense of the interconnection between all life forms. Simply put; her paintings celebrate love. Using symbols she explores various aspects of life, death, femininity, motherhood, freedom, relationships, and the sanctity of sexuality.

Brona's paintings bring simple joy, peace and harmony to the viewer, as well as sparking our own imaginations to dream dreams, and create anew.
